About Opal

Opal is a completely synthetic EPDM (ethylene propylene diene monomer) rubber, coloured all the way through and formulated for prolonged U.V. resistance against fading.

- Brightest colours - Completely synthetic rubber.
- Largest colour range - 18 colours to choose from.
- Longest lasting durability - Highest polymer content.
- Best U.V. resistance - Quality pigments with U.V bright options.
- U.V. brights are formulated with premium pigments to ensure the very best U.V. resistance.
- Consistent colours - Manufactured under ISO 9001 certified processes.
- Great surface elasticity - Fully vulcanised.
